

**OPERATING PERMIT (Conditional Major)** Issued Pursuant to Tennessee Air Quality Act

**Date Issued:**

**Date Expires:** July 1, 2012

**Permit Number:**

452349

DRAFT

**Issued To:**

Lincoln Road Builders, Inc.

**Installation Address:**

1922 Pulaski Hwy  
Fayetteville

**Installation Description:**

Source 02: Batch Mix Asphalt Plant  
with Baghouse Control

**Emission Source Reference No.**

52-0022  
Conditional Major Source

The holder of this permit shall comply with the conditions contained in this permit as well as all applicable provisions of the Tennessee Air Pollution Control Regulations.

**GENERAL CONDITION:**

1. The application that was utilized in the preparation of this permit is dated November 11, 1999, and signed by Mr. Tony Groce, President of the permitted facility. If this person terminates his employment or is reassigned different duties such that he is no longer the responsible person to represent and bind the facility in environmental permitting affairs, the owner or operator of this air contaminant source shall notify the Technical Secretary of the change. Said notification shall be in writing and submitted within thirty (30) days of the change. The notification shall include the name and title of the new person assigned by the source owner or operator to represent and bind the facility in environmental permitting affairs. All representations, agreement to terms and conditions and covenants made by the former responsible person that were used in the establishment of limiting permit conditions on this permit will continue to be binding on the facility until such time that a revision to this permit is obtained that would change said representations, agreements and covenants.

(conditions continued on next page)

\_\_\_\_\_  
TECHNICAL SECRETARY

No Authority is Granted by this Permit to Operate, Construct, or Maintain any Installation in Violation of any Law, Statute, Code, Ordinance, Rule, or Regulation of the State of Tennessee or any of its Political Subdivisions.

NON-TRANSFERABLE

CN-0827 (Rev. 9-92)

**POST AT INSTALLATION ADDRESS**

DRAFT RDA-1298

2. The permittee has elected to opt-out of being issued a major source operating permit pursuant to Division Rule 1200-3-9-.02(11)(a). The permittee would be considered a major source because their current "potential to emit" for sulfur dioxide, carbon monoxide and nitrogen oxides is greater than 100 tons per year of each at the time of application. The permittee has agreed to be subject to the following limitations in order to be below the major source applicability threshold for sulfur dioxide, carbon monoxide and nitrogen oxides of 100 tons per year of each.
3. Any non-compliance with any condition(s) of this permit set to restrain the "potential to emit" below the applicability thresholds of 1200-3-9-.02(11) of the Tennessee Air Pollution Control Regulations, shall be reported in writing to the Technical Secretary within three (3) working days of such discovery. This notification, at a minimum, shall include the identification of the source(s), identification of the permit condition(s) violated and details of the non-compliance (violation).
4. The permittee is placed on notice that **Conditions 7, 8 and 9** of this permit contain limitations that allow the permittee to opt-out of the major source operating permit program requirements specified in Division Rule 1200-3-9-.02(11). Failure to abide by these limits will not only subject the permittee to enforcement action by the State of Tennessee, but it may also result in the imposition of Federal enforcement action by the United States Environmental Protection Agency and the loss of being Federally recognized as a conditional major source.

Compliance with **Conditions 7, 8 and 9** assures that the source will be below the major source applicability thresholds for sulfur dioxide, carbon monoxide and nitrogen oxides of 100 tons per year of each. This assurance is based on AP-42 Chapter 11, Section 1 (Hot Mix Asphalt Plants, dated December, 2000), and Chapter 1, Section 3 (Fuel Oil Combustion, dated September, 1998) from which the emission factors were used to calculate emissions as shown below:

based on: AP-42 Chapter 11 Section 1	Parameter	based on use of fuel oil as fuel			based on use of natural gas as fuel		
		Emission Factor lb/ton	Emissions without limiting conditions, ton/yr	Emissions with limiting conditions, ton/yr	Emission Factor lb/ton	Emissions without limiting conditions, ton/yr	Emissions with limiting conditions, ton/yr
	SO <sub>2</sub>	See next table			0.0046	4.8	0.7
	CO	0.40	420.5	60.0	0.40	420.5	60.0
	NO <sub>x</sub>	0.12	126.1	18.0	0.025	26.3	3.8

based on: AP-42 Chapter 1 Section 3	Parameter	Type of Fuel Oil	Emission Factor, lb/1000 gal	Emissions without limiting conditions, ton/yr	Emissions with limiting conditions, ton/yr	Remarks
	SO <sub>2</sub>	#2, #3	142(S)	186.6*	26.6*	S is the fuel sulfur content, in percent (by weight).

\* The emissions shown are the maximum possible based on the maximum fuel sulfur content, S, allowed by **Condition 9**.

5. A report stating the compliance status of this source or facility with **Conditions 7, 8 and 9** shall be submitted by March 31 of every year starting in 2003. This report shall cover the preceding calendar year and shall include the records required by **Conditions 9 and 25**. This report shall be mailed to the following address:
- Columbia Environmental Assistance Center  
Division of Air Pollution Control  
2484 Park Plus Drive  
Columbia, TN 38401
6. Should proof of compliance for the pollutant with emission limitations on this permit, fuel composition, or other parameters be required, the emissions measuring test method(s) and procedure(s) are the following:

Pollutant or Parameter	Testing Methodology *
Particulate Matter	EPA Method 5
Sulfur Dioxide	EPA Method 8
Sulfur Content of Fuel Oil	EPA Method 19
Carbon Monoxide	EPA Method 10
Nitrogen Oxides	EPA Method 7

\* As published in the current 40 CFR 60, Appendix A

7. The production rate for this source shall not exceed 240 tons of asphalt per hour on a daily average basis and 300,000 tons during any period of twelve (12) consecutive months. Compliance with this requirement shall be indicated by the records required by **Condition 25**.

(conditions continued on next page)

8. Usage of fuel oil shall not exceed 600 gallons per hour on a monthly average basis. Compliance with this requirement shall be indicated by the records required by **Condition 25**.
9. The sulfur content of the fuel oil shall not exceed 0.5 percent by weight. Compliance with this requirement may be assured by providing an analysis of each fuel oil shipment, or by providing a written statement, obtained from each vendor on an annual basis, guaranteeing in advance that all fuel oil sold to the company will contain no more than 0.5 percent sulfur by weight. These records must be maintained at the source location and kept available for inspection by the Technical Secretary or his representative. These records must be retained for a period of not less than five (5) years.
10. Only No. 2 fuel oil, No. 3 fuel oil, and natural gas shall be used as fuels for this source.
11. Sulfur dioxide (SO<sub>2</sub>) emissions from this source shall not exceed 42.6 pounds per hour. Based on this hourly rate and the production limitations of **Condition 7**, sulfur dioxide emitted from this source shall not exceed 26.6 tons per year. Compliance with these requirements shall be demonstrated by compliance with **Conditions 7, 8 and 9**.  
This emission limitation is established pursuant to Rule 1200-3-9-.02(11)(a) of the Tennessee Air Pollution Control Regulations.
12. Carbon monoxide (CO) emissions from this source shall not exceed 96.0 pounds per hour. Based on this hourly rate and the production limitations of **Condition 7**, carbon monoxide emitted from this source shall not exceed 60.0 tons per year. Compliance with these requirements shall be demonstrated by compliance with **Conditions 7 and 8**.  
This emission limitation is established pursuant to Rule 1200-3-9-.02(11)(a) of the Tennessee Air Pollution Control Regulations.
13. Nitrogen oxides (NO<sub>x</sub>) emissions from this source shall not exceed 28.8 pounds per hour. Based on this hourly rate and the production limitations of **Condition 7**, nitrogen oxides emitted from this source shall not exceed 18.0 tons per year. Compliance with these requirements shall be demonstrated by compliance with **Conditions 7 and 8**.  
This emission limitation is established pursuant to Rule 1200-3-9-.02(11)(a) of the Tennessee Air Pollution Control Regulations.
14. Volatile organic compounds (VOC) emissions from this source shall not exceed 2.0 pounds per hour (1.2 tons per year). Compliance with this requirement may be assured by compliance with **Conditions 7 and 8**.  
This emission limitation is established pursuant to Rule 1200-3-7-.07(1) of the Tennessee Air Pollution Control Regulations.
15. Total particulate matter (TSP) emitted from this source shall not exceed 41.6 pounds per hour (26.0 tons per year). Compliance with this requirement shall be indicated by compliance with **Conditions 7 and 16**.  
This emission limitation is established pursuant to Rule 1200-3-7-.03(1) of the Tennessee Air Pollution Control Regulations.
16. The fabric filter air pollution control device must operate at all times when this source is operating.
17. Visible emissions from roads and parking areas shall not exceed ten (10) percent opacity utilizing Tennessee Visible Emissions Evaluation (TVEE) Method 1, as adopted by the Tennessee Air Pollution Control Board on April 29, 1982, as amended on September 15, 1982, and as amended on August 24, 1984.
18. Visible emissions from this source not covered by **Condition 17** shall not exceed twenty (20) percent opacity as determined by EPA Method 9, as published in the Federal Register, Volume 39, Number 219 on November 12, 1974. (6-minute average)
19. Fugitive emissions from this source shall be controlled as specified in Rule 1200-3-8-.01. Specifically, no person shall cause, suffer, allow, or permit fugitive dust to be emitted in such manner to exceed five (5) minutes per hour or twenty (20) minutes per day as to produce a visible emission beyond the property line of the property on which the emission originates, excluding malfunction of equipment as provided in Chapter 1200-3-20. Fugitive emissions from this source shall be determined by Tennessee Visible Emissions Evaluation (TVEE) Method 4 as adopted by the Tennessee Air Pollution Control Board on April 16, 1986.
20. Reasonable precautions must be taken to prevent the generation of fugitive dust as these precautions are defined in Rule 1200-3-8-.01 in the Tennessee Air Pollution Control Regulations.
21. Upon the malfunction/failure of emission control device(s) serving this source, the operation of the process(es) served by the device(s) shall be regulated by Chapter 1200-3-20 of the Tennessee Air Pollution Control Regulations.

(conditions continued on next page)

22. Routine maintenance, as required to maintain specified emission limits, shall be performed on the air pollution control devices. Maintenance records shall be recorded in a suitable permanent form and kept available for inspection by the Division. These records must be retained for a period of not less than five (5) years.
23. This permit is valid only at this location.
24. The permittee shall apply for renewal of this permit not less than sixty (60) days prior to the permit's expiration date.
25. A record of the operating hours, fuel oil usage and asphalt production at this facility, in a form that readily provides the information required in the following tables, shall be maintained at the source location and kept available for inspection by the Technical Secretary or his representative. This record shall be retained for a period of not less than five (5) years.

Monthly Log

Month:

Year:

Date	Hours of operation (total)	Hours of operation (using fuel oil)	Asphalt production (tons)	Asphalt production rate (ton/hr) *
1				
2				
3				
:				
:				
:				
31				
<b>Totals:</b>				

\* The *Asphalt production rate (ton/hr)* value is the *Asphalt production (tons)* value divided by the *Hours of operation (total)* value. The *Asphalt production rate (ton/hr)* value is the hourly asphalt production rate on a daily average basis, as required by **Condition 7**.

Yearly Log

Month / Year	Hours of operation (using fuel oil)	Fuel oil usage (gal)	Fuel oil usage rate (gal/hr) *	Asphalt production (tons)	Asphalt production (tons/12-month) **

\* The *Fuel oil usage rate (gal/hr)* value is the *Fuel oil usage (gal)* value divided by the *Hours of operation (using fuel oil)* value. The *Fuel oil usage rate (gal/hr)* value is the hourly fuel oil usage rate on a monthly average basis, as required by **Condition 8**.

\*\* The *Asphalt production (tons/12-month)* value is the sum of the *Asphalt production (tons)* values for the 11 months preceding the month just completed plus the *Asphalt production (tons)* value for the month just completed. The *Asphalt production (tons/12-month)* value is the asphalt production on a twelve consecutive month basis, as required by **Condition 7**.
